

### ABSTRACT

A nontoxic liquid for cooling of all types of engines provides anticorrosive protection, has a boiling point over 130°C, has a freezing point of at least -40°C, and is not harmful to people, animals and plants. The inhibitors and additives provide basic protection against freezing and corrosion in engine. The additives are compatible with the additives for cooling systems recommended by some vehicle and motor producers, like Chrysler, General Motors, and Ford.
